SUMMARY

I'm software developer, focused on backend development. I have coded in several languages, mainly PHP and Javascript. Now, I'm involved in Golang, but I'm open to learning new other languages and technologies.
When it comes to work, I'm a team player. We all have something to contribute!

WORK EXPERIENCE

Software Developer
Arex | Nov 2018 - present

- Created a service (front and back-end) to handle onboarding of the new customers, with different flows and external integrations, like contract generation, signing, notifications and other services.
- Worked on developments around financial data, such as, invoice importing from third parties or financial transactions management.
- Setup deployments, pubsub queues, and other infrastructure stuff.
